SUMMARY

Motivated Information Technology student aspiring to begin a career in Software Quality Assurance (QA). Strong understanding of SDLC, STLC, Manual Testing, Functional Testing, Regression Testing, Smoke Testing, API Testing using Postman, and SQL. Experienced in testing MERN stack applications by creating test scenarios, validating REST APIs, identifying defects, and ensuring software quality. Quick learner with strong analytical and problem-solving skills.

EDUCATION

B.Tech - Information Technology Sri Shakthi Institute of Engineering and Technology	CGPA: 8.44	2023 - 2027
HSLC - Computer Science R.C. Govt. Girls Higher Secondary School	PERCENTAGE: 86.16	2022 - 2023

SKILLS

Programming Languages: Java, JavaScript
Testing: Manual Testing, Functional Testing, Regression Testing, Smoke Testing, Sanity Testing, API Testing, UI Testing, Black Box Testing
Automation Testing: Playwright (JavaScript)
Tools: Postman, Git, GitHub, VS Code
Web Technologies: HTML, CSS, React.js
Backend: Node.js, Express.js, REST APIs
Databases: MongoDB, MySQL

PROJECT

Elderly Care Network - (MERN Stack) | [Github](#) | [Live](#)

Developed a MERN-based web application connecting elderly users with caregivers and essential services. Built responsive user interfaces and RESTful APIs using React, Node.js, Express.js, and MongoDB. Performed manual testing of modules including user authentication, caregiver search, reminders, health monitoring, and role-based access. Designed and executed test scenarios, validated REST APIs using Postman, identified functional issues, and ensured application reliability through thorough testing and debugging.

Job Portal Web Application - (MERN Stack) | [Github](#)

Developed a role-based job portal enabling recruiters and job seekers to manage job postings and applications securely. Implemented JWT authentication, resume upload, and role management features. Performed manual testing of login, registration, job posting, resume upload, and application workflows. Validated REST APIs using Postman, verified input validations and authentication, and tested the application to ensure a smooth and reliable user experience.

Tichi Web Application – Automation Testing (Playwright, JavaScript)

Developed automated test scripts for the Login and Sign-Up modules of the Tichi web application using Playwright and JavaScript. Verified UI elements, input validations, authentication flow, navigation, and error messages through automated test cases. Used the Page Object Model (POM) for better code reusability and generated HTML reports to track test execution results.

CERTIFICATIONS AND ACHIEVEMENTS

- Completed “The Ultimate GitHub Guide for Emerging Technologies” Bootcamp – NoviTech R&D Pvt. Ltd. (March 2025)
- Participated in Web Designing Workshop – XENIRA, Kalam 2024, Sri Shakthi Institute of Engineering and Technology
- Solved 250+ problems on LeetCode – focusing on Data Structures and Algorithms and strengthening problem-solving skills in algorithms, time complexity, and coding efficiency
